

Actiontec Broadband Equipment Energy Information

ACTIONTEC is an active participant in the Industry Voluntary Agreement for Ongoing Improvement to the Energy Efficiency of Small Network Equipment (SNE). This Voluntary Agreement was established in June 2015 and covers Internet modems, routers, and other equipment that deliver broadband service to more than 90% of the residential broadband market. The power consumption ratings reflected below are in accordance with this Voluntary Agreement of major video providers. Additional information may be found at the [Voluntary Agreement](#). This information will be updated as new devices are made available.
